Tech Stack

React Next.js MaterialUI PostgreSQL

Features:

Browse over 40+ (more can be added to the DB) hotel options and filter by brand, location, and stay amount/dates.

Fully functioning and dynamic front-end and back-end (postgreSQL - hosts hotel data).

Getting Started

Steps to deploy (you must have js installed):

1. npm install
2. npm run dev

Open <http://localhost:3000> with your browser to see the result.

--Entire rest of document can be ran in one SQL query to fully create/populate database

--NOTE: this version of the database does not include image files for each hotel which is found in our submitted database. It will still function fully.
